STATE OF INDIANA

INDIANA UTILITY REGULATORY COMMISSION

PETITION OF NORTHERN INDIANA PUBLIC SERVICE COMPANY FOR APPROVAL OF A GAS COST ADJUSTMENT TO BE APPLICABLE IN THE MONTHS OF JUNE, JULY, AND AUGUST 2015, PURSUANT TO IND. CODE § 8-1-2-42(g).	))))))	**CAUSE NO. 43629 GCA 34** **APPROVED:** MAY 27 2015

ORDER OF THE COMMISSION

Presiding Officer:
Jeffery A. Earl, Administrative Law Judge

On March 27, 2015, in accordance with Ind. Code § 8-1-2-42, Northern Indiana Public Service Company ("NIPSCO") filed its Petition for Gas Cost Adjustment ("GCA") with attached Schedules to be applicable during the months of June, July, and August 2015. NIPSCO also prefiled the direct testimony and exhibits of the following:

- Katherine A. Cherven, Manager of Compliance in NIPSCO's Rates and Regulatory Finance Department;
- Thomas P. Harmon, Manager, Financial Reporting of NIPSCO, at NiSource Corporate Services Company; and
- Patrick J. Pluard, Director of Portfolio Optimization in NIPSCO's Energy Supply and Trading Department.

On April 27, 2015, in conformance with the statute, the Indiana Office of Utility Consumer Counselor ("OUCC") filed the direct testimony and exhibits of the following:

- Pamela Sue Sargent Haase, CPA, Partner at London Witte Group LLC; and
- Jerome D. Mierzwa, Principal and Vice President of Exeter Associates, Inc.

The Commission held an evidentiary hearing in this Cause at 9:30 a.m. on May 11, 2015, in Hearing Room 224, 101 West Washington Street, Indianapolis, Indiana. NIPSCO and the OUCC were present and participated. No members of the general public appeared or sought to testify at the hearing.

Based upon the applicable law and the evidence presented, the Commission finds:

1. **Statutory Notice and Commission Jurisdiction.** Notice of the hearing in this Cause was given and published by the Commission as required by law. NIPSCO is a public utility as defined in Ind. Code § 8-1-2-1(a). Under Ind. Code § 8-1-2-42(g), the Commission has jurisdiction over changes to NIPSCO's rates and charges related to adjustments in gas

costs. Therefore, the Commission has jurisdiction over NIPSCO and the subject matter of this Cause.

2. **NIPSCO's Characteristics.** NIPSCO is a corporation organized and existing under the laws of the State of Indiana. NIPSCO's principal office is located at 801 East 86th Avenue, Merrillville, Indiana. NIPSCO renders natural gas utility service to the public in Adams, Allen, Benton, Carroll, Cass, Clinton, DeKalb, Elkhart, Fulton, Howard, Huntington, Jasper, Kosciusko, LaGrange, Lake, LaPorte, Marshall, Miami, Newton, Noble, Porter, Pulaski, St. Joseph, Starke, Steuben, Tippecanoe, Tipton, Wabash, Warren, Wells, White, and Whitley counties in Indiana and owns, operates, manages, and controls plant and equipment for the distribution and furnishing of such service.

3. **Source of Natural Gas.** Ind. Code § 8-1-2-42(g)(3)(A) requires NIPSCO to make every reasonable effort to acquire long-term gas supplies so as to provide gas to its retail customers at the lowest gas cost reasonably possible.

Mr. Pluard said that NIPSCO manages a balanced and fully diversified gas supply portfolio that includes a variety of commodity, transportation, and storage resources. The commodity portfolio is balanced with a combination of fixed-price (physical and financial) and market-based purchases. The commodity portfolio diversification is achieved by acquiring gas from a number of suppliers through a competitive bidding process and the utilization of a variety of pricing structures sourced from multiple locations. These gas supplies are delivered to NIPSCO through multiple firm transportation arrangements with several different interstate gas pipelines, providing access to multiple supply basins. NIPSCO also has several firm, contractual storage services and on-system storage capability to meet its gas customers' requirements. The storage portfolio is further diversified through a variety of storage service types in multiple locations in the market area and in producing regions.

Mr. Pluard said that during the three-month recovery period beginning June 1, 2015, NIPSCO will purchase supply under firm arrangements on both a term and spot-market basis. To achieve diversity of supply, NIPSCO has contracted with several pipelines, permitting access to multiple supply basins. NIPSCO has firm transportation contracts with Natural Gas Pipeline Company of America ("Natural"), Panhandle Eastern Pipe Line Company ("Panhandle"), Trunkline Gas Company ("Trunkline"), ANR Pipeline Company ("ANR"), Vector Pipeline ("Vector"), and Crossroads Pipeline ("Crossroads"). After allocations to the Choice customer suppliers, the firm, long-haul transportation contracts with Natural, Panhandle, Trunkline, Crossroads, and ANR have an aggregate maximum daily quantity during the peak season of approximately 360,000 Dth per day.

With regard to storage, Mr. Pluard said that firm storage service contracts with Natural, Panhandle, ANR, Moss Bluff Hub Partners, L.P., Washington 10 Storage Corporation, and Egan Hub Partners, L.P. provide an annual peak working storage capability of approximately 32,200,000 Dth, with maximum daily withdrawal capability of approximately 605,000 Dth to meet winter peaks, after allocations to the Choice customer suppliers.

The Commission has indicated that Indiana's gas utilities should make reasonable efforts to mitigate gas price volatility. This includes a program that considers market conditions and the price of natural gas on both current and forward-looking bases. Based on the evidence presented, we find that NIPSCO has and continues to follow a policy of securing natural gas supply at the lowest gas cost reasonably possible in order to meet anticipated customer requirements. Therefore, we find the requirement of this statutory provision has been fulfilled.

4. Purchased Gas Cost Rates. Ind. Code § 8-1-2-42(g)(3)(B) requires that NIPSCO's pipeline suppliers have requested or filed pursuant to the jurisdiction and procedures of a duly constituted regulatory authority the costs proposed to be included in the GCA factor. The evidence of record shows that the proposed gas costs include transport rates that have been filed by NIPSCO's pipeline suppliers in accordance with Federal Energy Regulatory Commission procedures. We have reviewed the cost of gas included in the proposed gas cost adjustment charge and find the cost to be reasonable. Therefore, we find that the requirement of this statutory provision has been fulfilled.

5. Earnings Test. Ind. Code § 8-1-2-42(g)(3)(C), in effect, prohibits approval of a GCA factor that results in NIPSCO earning a return in excess of the return authorized by the last Commission Order in which NIPSCO's basic rates and charges were approved. NIPSCO's current basic rates and charges were approved on November 4, 2010 in Cause No. 43894. The Commission authorized NIPSCO to earn a net operating income ("NOI") of $39,841,895. In the May 31, 2011 Order in Consolidated Cause Nos. 43941, 43942, and 43943 ("Merger Order"), the Commission authorized an incremental annual NOI of $4,602,071 associated with the merger of Kokomo Gas and Fuel Company and Northern Indiana Fuel & Light Co. into NIPSCO. Thus NIPSCO's combined authorized NOI is $44,443,966.

To transition to the requirement in the August 27, 2014 Order in Cause No. 44374 (the "GCA Investigation Order") that all schedules and testimony be filed with the petition, this filing includes financial statements and earnings test calculations for the most recently closed, quarter-end, 12-month period (December 31, 2014). In the past, NIPSCO submitted its schedules and testimony in a revised filing that incorporated data from the quarter closed after the initial filing was made. The earnings test calculation performed in this GCA is identical to that performed in GCA 33 because the books for the 12-month period ending March 31, 2015 were not available at the time this filing was made. This duplication will only occur once.

As was the case in GCA 33, the evidence indicates that for the 12 months ending December 31, 2014, NIPSCO's actual net operating income was $62,477,705. Therefore, we find that NIPSCO is earning a return in excess of that authorized in its last rate case.

Because NIPSCO's return exceeds the amount authorized, Ind. Code § 8-1-2-42.3 requires the Commission to determine the amount, if any, of the return to be refunded to customers through the variance in this Cause. A refund is only appropriate if the sum of the differentials (both positive and negative) between the determined return and the authorized return during the relevant period, as defined by Ind. Code § 8-1-2-42.3(a), is greater than zero.

Based on the evidence, we find that the sum of the differentials during the relevant period is less than zero, and therefore, it is not appropriate to require a refund of any of the amount over-earned in this Cause.

6. Estimation of Purchased Gas Costs. Ind. Code § 8-1-2-42(g)(3)(D) requires that NIPSCO's estimate of its prospective average gas costs for each future recovery period be reasonable. The Commission has determined that a comparison of the variance to the incremental cost of gas on Schedule 13 be used to determine if the prior estimates are reasonable when compared to the corresponding actual costs. A 12-month rolling average comparison helps to eliminate the inherent variance related to cycle billing and seasonal fluctuations. The evidence presented indicates that NIPSCO's 12-month rolling average comparison was -1.00% for the period ending February 28, 2015. Based on NIPSCO's historical accuracy in estimating the cost of gas, we find that NIPSCO's estimating techniques are sound, and NIPSCO's prospective average estimate of gas costs is reasonable.

7. Reconciliations.

A. Variances. Ind. Code § 8-1-2-42(g)(3)(D) also requires that NISPCO reconcile its estimate for a previous recovery period with the actual purchased gas cost for that period. The evidence presented in this proceeding establishes that the commodity and bad debt variance for the months of December 2014 through February 2015 ("Reconciliation Period") is an under-collection of $1,250,477. This amount should be included, based on estimated sales percentages, in this GCA and the next three GCAs. The amount of the Reconciliation Period variance to be included in this GCA as an increase in the estimated net cost of gas is $72,243.

The commodity and bad debt variance from prior recovery periods applicable to the current recovery period is an under-collection of $192,508. Combining this amount with the Reconciliation Period commodity variance to be included in this GCA results in a total under-collection of $264,751 to be applied in this GCA as an increase in the estimated net cost of gas.

The evidence presented in this proceeding establishes that the demand variance for the Reconciliation Period is an over-collection of $17,498,955. This amount should be included, based on estimated sales percentages, in this GCA and the next three GCAs. The amount of the Reconciliation Period demand variance to be included in this GCA as a decrease in the estimated net cost of gas is $1,153,589.

The demand variance from prior recovery periods applicable to the current recovery period is an under-collection of $487,709. Combining this amount with the Reconciliation Period demand variance to be included in this GCA results in a total over-collection of $665,880 to be applied to this GCA as a decrease in the estimated net cost of gas.

B. Refunds. NIPSCO received no new refunds during the Reconciliation Period. NIPSCO has $46,261 in refunds from prior periods applicable to the current recovery

period. Therefore, NIPSCO has $46,261 in refunds to be applied in this GCA as a decrease in the net cost of gas as reflected on Schedule 12A.

8. Resulting Gas Cost Adjustment Factor. The estimated net cost of gas to be recovered for June 2015 is $2,806,720, for July 2015 is $2,937,294, and for August 2015 is $2,787,565. Adjusting these totals for the variance and refund amounts yields gas costs to be recovered through the GCA factor of $2,657,491 for June 2015, $2,782,250 for July 2015, and $2,644,448 for August 2015. After dividing these amounts by the appropriate estimated sales, adding demand costs, and adjusting for Bad Debt expense as provided in Cause No. 43894 and Indiana Utility Receipts Tax, NIPSCO's recommended GCA factors are:

Estimated GCA per Dth

Rate Class	June 2015	July 2015	August 2015
Residential	$4.782	$5.023	$4.966
General Service	$4.717	$4.506	$4.846

9. Effects on Residential Customers. NIPSCO requests authority to approve the GCA factor of $4.782/Dth for June 2015, $5.023/Dth for July 2015, and $4.966/Dth for August 2015. The table below shows the gas costs a residential customer will incur under the proposed GCA factor based on 10 Dth of usage. The table also compares the proposed gas costs to what a residential customer paid most recently (March 2015 - $5.773/Dth) and a year ago (June 2014 - $5.211/Dth, July 2014 - $5.269/Dth, and August 2014 - $4.362/Dth). The table reflects costs approved through the GCA process. It does not include NIPSCO's base rates or any applicable rate adjustment mechanisms.

Month	Proposed Gas Costs (10 Dth)	Current		Year Ago	
		Gas Costs (10 Dth)	Difference	Gas Costs (10 Dth)	Difference
June 2015	$47.82	$57.73	($9.91)	$52.11	($4.29)
July 2015	$50.23	$57.73	($7.50)	$52.69	($2.46)
August 2015	$49.66	$57.73	($8.07)	$43.62	$6.04

10. Interim Rates. We are unable to determine whether Petitioner will earn an excess return while these GCA factors are in effect. Accordingly, the rates approved in this Order are interim rates subject to refund pending reconciliation in the event an excess return is earned.

11. Monthly Flex Mechanism. The Commission indicated in prior Orders that Indiana's gas utilities should make reasonable efforts to mitigate gas price volatility. NIPSCO's approved monthly flex mechanism is designed to address the Commission's concerns. Therefore, NIPSCO may utilize a monthly flex mechanism to adjust the GCA factor for the subsequent month. The flex mechanism applies to the mix of volumes between spot, fixed, and storage gas purchases as long as the total volumes remain unchanged from the utility's total monthly volume of gas estimated in this GCA proceeding. The flex mechanism

also applies to the estimated unit price of spot, fixed, or storage gas purchases. The flex mechanism is to be filed no later than three business days before the beginning of each calendar month during the GCA period. Market purchases in the flex mechanism are to be priced at NYMEX prices on a day no more than ten business days prior to the beginning of said calendar month. Changes in the market price included in the flex mechanism are limited to a maximum adjustment (higher or lower) of $1.00 from the initial market price in this GCA proceeding. Finally, NIPSCO shall file all material that supports its decision to flex or not to flex as outlined in our Order in Cause No. 44374.

IT IS THEREFORE ORDERED BY THE INDIANA UTILITY REGULATORY COMMISSION that:

1. The Petition of Northern Indiana Public Service Company for a gas cost adjustment for natural gas service, as set forth in Paragraph No. 8, is approved, subject to refund in accordance with Paragraph 10.

2. Prior to implementing the GCA factors approved above, or any future flexed factor, NIPSCO shall file with the Commission under this Cause the applicable rate schedules for the factor.

3. This Order shall be effective on and after the date of its approval.

STEPHAN, HUSTON, AND WEBER CONCUR; MAYS-MEDLEY AND ZIEGNER ABSENT:

APPROVED: MAY 27 2015

I hereby certify that the above is a true and correct copy of the order as approved.
