

Secondary

Indiana does not want to place arbitrary limits or requirements on schools and or career centers in terms of the number of programs offered or the number of students enrolled. Therefore, an eligible recipient will only be required to offer at least one program of study. However, schools and career centers should provide a sufficient number of programs of study to ensure that a significant percentage of students have the opportunity to participate in CTE programs of study that meet the needs of the local labor market.

Secondary Size, Scope, and Quality:

To be of sufficient size, scope and quality, a CTE program of study in Indiana must include or be making progress toward including the following components:

- The program of study must be able to meet the minimum facility and equipment requirements for a minimum of 10 students. Moderate and High Value programs of study will take steps to expand the number of students enrolled, equipment, and/or facilities if the waitlist exceeds 50% of the current capacity.
- Programs of study, including joint programs of CTE and locally developed pathways that have been registered with the state, must adhere to state-approved courses and course sequences. Each program of study must address the standards and competencies associated with each state-approved course through relevant, real-world and applied instructional strategies.
- Secondary programs of study should be structured to encourage persistence in students to go beyond CTE Concentrator status and to pursue valued postsecondary credentials, like certificates, degrees and industry certifications that are integrated into the program of study.
- Students and their families are provided career advisement and academic guidance to help students identify career interests and to best prepare for college and career opportunities. Students should have a personalized multi-year graduation plan that is connected to postsecondary education.
- Programs of study are accessible to all students, specifically students who are members of special populations, by being free from unnecessary barriers to enrollment or participation. Historically underrepresented students are actively recruited and have the opportunity to succeed through necessary accommodations and supportive services.
- The program of study includes the development of employability and leadership skills through a wide range of embedded and stand-alone work-based learning opportunities and participation in career and technical student organizations.
- Programs of study must maintain on-going relationships among education, business and other community stakeholders, such as advisory boards or sector partnerships to help validate and keep current the technical and workforce readiness skills and program improvement.
- The program of study is focused on continuous improvement and engages with partners and stakeholders to achieve performance targets for Perkins performance indicators and utilizes data to identify and reduce disparities and performance gaps among population groups.

Postsecondary Size Scope and Quality

To be of sufficient size, scope and quality, a CTE program of study in Indiana must include or be making progress toward including the following components:

- Postsecondary CTE programs must be aligned with business and industry as validated by local or regional business advisory committees and must be part of one of the allowable cluster areas.
- Postsecondary eligible institutions must provide students with the opportunity to earn a certificate, associate's degree, industry certification, and/or licensure approved by the state in a CTE approved career cluster.
- A postsecondary program of study provides students the opportunity to be a CTE Concentrator. Which is defined as a postsecondary student that earned at least 12 credits within a CTE program or completed such a program if the program encompasses fewer than 12 credits.
- Programs/Programs of Study are strongly encouraged to include work-based learning opportunities for students.
- The program or programs of study achieve or consistently makes progress toward state-determined levels of performance and engages in periodic evaluation, informed by data, to reduce or eliminate disparities or performance gaps and to improve program quality and effectiveness.
- Programs/Programs of Study are accessible to and supportive of all students, especially students who are members of special populations.
- Postsecondary programs of study provide opportunities for secondary alignment, and can provide evidence of operational agreements with secondary schools.
