NCARB Certificate #33,151
Indiana Registered Interior Designer No. 00142

Experience

TowerPinkster Company, (Previously KovertHawkins Architects, Inc.) Principal, 1985-present.

A founding partner with over 40 years of diverse experience, John has personally designed and managed over 2,000 projects in both the public and private sectors. His projects have received national, state and local awards for quality and innovative design. He is a pioneer in digital architectural illustrations. His work has been exhibited in Korea, Japan, Portugal, Denmark, Germany and throughout the United States. His illustrations have been published in *Chen's Architecture in Color Drawings*, *Uddin's Digital Architecture*, and several *Architecture in Perspective* Catalogs. From 2005-2017 John was a member of the Indiana Fire Prevention and Building Safety Commission, where his many duties included adoption of the 2008 and 2014 Indiana Building Code and the 2010 Indiana Energy Code, authoring several of the Indiana amendments to those codes and fiscal impact statements for the 2008 and 2014 Indiana Building Codes. In 2013, Gov. Mike Pence appointed him as Chairman of the Commission. In this role he led the adoption of four new major codes, prevented automatic expiration of the Indiana Energy Code, adopted permanent stage rigging rules in response to the Indiana State Fair collapse, implemented an online variance application system, and helped develop legislation and regulatory criteria for certifying local jurisdictions to perform plan reviews.

He has been a guest lecturer at Ball State's College of Architecture & Planning on the topics of Building Codes, Construction Delivery Methods, Philosophy, Illustration, and Resilient Design. He has presented AIA accredited seminars on the 2010 Indiana Energy Code, the 2014 Indiana Building Code, Tilt-Up Concrete construction, and Resilient Design.

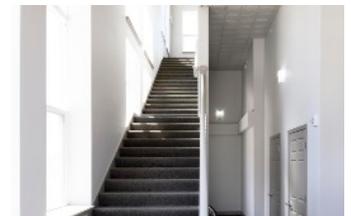

Humana, Inc., Design & Construction Department, Louisville, KY. Sr. Project Architect, 1986-1988
Humana owned and operated for-profit hospitals throughout the U.S. and in Europe during this time. John managed the design of addition and renovation projects for hospitals in thirteen states, including Kentucky, Tennessee, North Carolina, West Virginia, Virginia, Illinois, and Kansas.

Bickel Gibson Architects, Louisville, Kentucky. Graduate Architect, 1982-1986
Graduate architect working on a number of commercial and institutional projects, including the Landside Terminal Building at Louisville International Airport (then known as Standiford Field), and a new Main Post Office in Shelbyville, Kentucky.

James Associates, Jeffersonville, Indiana. Intern Architect, 1980, 1981
Six month internship as part of the Bachelor of Architecture curriculum at Ball State and the Summer after internship. Hand drafting primarily on K-12 school projects.
