Table 1-1. Real and Personal Property ......8

## **Mission of Reassessment**

The mission of a reassessment is to inventory, verify, and value all real estate parcels. This process distributes the property tax burden in a uniform and equitable manner. The reassessment of real property includes the following:

- Land
- Buildings and fixtures situated on the land
- Appurtenances to land
- An estate in land or an estate, right, or privilege in mines located on the land or minerals located in the land if the estate, right, or privilege is distinct from the ownership of the surface of the land.

Residential, commercial and industrial land, and agricultural home sites are valued based on values established by the assessing official. The method for valuing buildings and other improvements are the cost of replacing the improvement minus depreciation, the comparable sales approach, and capitalized income approach.

## **Reassessment of Real Property**

A general reassessment of all real property within the state is required as of January 1st of each year. The tax liability resulting from the reassessment is determined by multiplying the net district tax rate by the net assessed valuation of the property less any credits the property may qualify for. All taxes on real property are due in two (2) equal installments on May 10 and November 10 of the following year.

Assessing officials must follow the rules of the Department of Local Government Finance in making any assessment or cyclical reassessment of real property. Statewide cyclical reassessments began on July 1, 2014 for the 2015-pay-2016 property taxes, and the subsequent four (4) years. The reassessment period for collecting data, inspecting, and valuing property is thirty-two (32) months.

### **Place of Assessment and Person Liable**

Real property is assessed at the place where it is situated, and it is assessed to the person liable for the taxes as provided in IC 6-1.1-2-4(b) (c). Generally, the owner of any tangible property on the assessment date of a year is liable for the taxes imposed on the property for that year. However, a person holding, possessing, controlling, or occupying any tangible property on the assessment date of a year is liable for the taxes imposed for that year unless the property is assessed and taxed in the name of the owner, or the owner is liable for the taxes under a contract with that person.

Tangible property of a partnership is listed and assessed in the firm name with each partner jointly and severably liable for the taxes assessed.

Real property that is controlled by an executor, administrator, guardian, trustee, or receiver is assessed to the executor, administrator, guardian, trustee, or receiver.

The undivided real property of a deceased person that is not under the control of an executor or administrator may be assessed to the decedent's heirs or devisees without designating the heirs or devisees by name. The real property may be assessed in this manner until notice of:

- the division of the property;
- the names of the heirs or devisees; and
- the portion of the property belonging to each heir or devisee;

is given to the auditor of the county in which the real property is situated.

Each heir or devisee is liable for the total taxes imposed on the undivided real property of a decedent. If an heir or devisee pays the total taxes, the heir or devisee may recover from the other heir or devisee:

- the other heir's or devisee's share of the total taxes; and
- interest on the amount referred to above.

In addition, the heir or devisee who pays the taxes acquires the lien for the taxes paid on the property interest of the other heirs or devisees.

#### **Appraisal and Examination of Buildings**

The jurisdiction in which the property is located is responsible for appraising the property or having it appraised. The assessing official, or the assessor's authorized representative, may enter and fully examine all buildings and structures in order to determine the assessed value.

The assessing official keeps the reassessment data and records current by securing the necessary field data and making changes in the assessed value of real property as changes occur in its use. The records must show the assessed value of the real property in accordance with the rules of the Department of Local Government Finance.

#### Notice to Taxpayers and County Auditor

The assessing official or PTABOA (County Board) must give notice to the taxpayer, by mail, of the amount of the assessment or cyclical reassessment. During a period of cyclical reassessment, the assessing official must mail the notice of assessment within ninety (90) days after the completion of the appraisal of a parcel. The notice of assessed value is given on Form 11, Notice of Assessment, as prescribed by the Department of Local Government Finance.

The assessing official must notify the county auditor of the assessed value of land and improvements immediately after determining the assessed value of all property in the jurisdiction. The notice must be on Form 29 as prescribed by the Department of Local Government Finance.

# **Employment of Staff and Professional Appraisers**

Subject to the approval of the Department of Local Government Finance and the requirements of IC 6-1.1-4-18.5, an assessing official or a group consisting of the assessing officials in a county can employ professional appraisers, individuals, or firms that are certified under IC 6-1.1-31.7 as technical advisors.

After notice to the assessing officials in the county, a majority of the assessors authorized to vote under this subsection may vote as follows:

- to employ a professional appraiser to act as a technical advisor in the county during a general reassessment period
- to appoint an assessor or a group of assessors to
  - enter into and administer the contract with a professional appraiser employed under this section
  - oversee the work of a professional appraiser employed under this section.

Each assessing official has one vote. A decision by a majority of the persons authorized to vote is binding on the assessing officials in the county. Subject to the limitations contained in IC 6-1.1-4-18.5, the appointed assessor or assessors may contract with a professional appraiser employed under this section to supply technical advice during a general reassessment period for all jurisdictions in the county. A proportionate part of the appropriation to all jurisdictions for assessing purposes will be used to pay for the technical advice.

## Written Contract for Technical Advisors

When utilizing the services of a professional appraiser or appraisal firm for assessment or reassessment purposes, the parties must enter into a written contract. The contract used must be either a standard contract developed by the Department of Local Government Finance or a contract that has been specifically approved by the Department of Local Government Finance.

Notice must be given to solicit bids from anyone desiring to furnish this service before a contract is awarded. The notice of the time and place for receiving bids for the contract must be given by one (1) insertion in two (2) newspapers of general circulation published in the county and representing each of the two leading political parties in the county. If there is only one newspaper published, notice in that one newspaper is sufficient.

The county shall award the contract to the lowest and best bidder who meets all requirements under law for entering a contract to serve as technical advisor in the assessment of property. However, any and all bids may be rejected, and new bids may be asked.

Every contract must contain the following:

• a fixed date for completion of all responsibilities under the contract;

- a penalty clause under which the amount to be paid for appraisal services is decreased for failure to complete specified services within the specified time;
- a provision requiring the appraiser, or appraisal firm, to make periodic reports to the assessing officials involved;
- a provision stipulating the manner in which, and the time intervals at which, the periodic reports are to be made to the assessing official(s) involved;
- a precise stipulation of what service or services are to be provided and what class or classes of property are to be valued;
- a provision stipulating that the contractor will generate complete parcel characteristics and parcel assessment data in a manner and format acceptable to the Legislative Services Agency and the Department of Local Government Finance;
- a provision stipulating that the Legislative Services Agency and the Department of Local Government Finance have unrestricted access to the contractor's work product under the contract;
- a provision stating that the contract is void and unenforceable if the appraiser is not certified by the Department of Local Government Finance subsequently revokes the professional appraiser's certification under IC 6-1.1-31.7-4 after the contract is executed; and
- any other necessary provisions determined by the Department of Local Government Finance.

The county council shall appropriate the funds necessary for the employment of the deputies, employees, and technical advisors, including any contractual obligations entered into for professional appraisal services.

## **Department of Local Government Finance Review**

The Department of Local Government Finance shall periodically check the conduct of a general reassessment of property. The Department may inform assessing officials and the presidents of county councils in writing if it finds that the general reassessment is not being properly conducted or if property assessments under the general reassessment are not being properly made. Failure of an official to provide the Department of Local Government Finance, or a representative of the Department of Local Government Finance, with access to official records is evidence of misconduct in office.

The failure of the Department to inform local officials that the reassessment is not being properly conducted or that assessments are not being properly made is not to be construed as an indication by the Department that the general reassessment is being properly conducted, or that property assessments under the general reassessment are being properly made. If a jurisdiction official fails to prepare a report, a plat, or other property tax record, the Department of Local Government Finance or its representative may prepare it and certify the expenses to the respective jurisdiction that failed to perform the duty. The jurisdiction shall pay the expenses within thirty (30) days. A jurisdiction may recover any amount from the official who failed to perform the duty.

### **Property Reassessment Fund**

The county council of each county must levy an amount equal to the estimated costs of the reassessments under IC 6-1.1-4-28.5 for the group of parcels to be reassessed in that year.

The Department of Local Government Finance may raise or lower the property taxes levied for a general reassessment if it determines the estimated cost of the general reassessment has changed.

The collections of property taxes levied for this purpose must be deposited by the county treasurer in a property reassessment fund established by the county auditor. The county shall invest any money accumulated in the property reassessment fund until the money is needed for reassessment expenses. The interest earned on the investment is paid into that fund.

Money assigned to the property reassessment fund may be used only to pay the cost of the following:

- the general reassessment of real property
- computerization of assessment records
- updating of plat books
- development or updating of detailed soil survey data by the United States Department of Agriculture or its successor agency
- payments to assessing officials or members of the Property Tax Assessment Board of Appeals for training by the Department of Local Government Finance
- payments for the salary of permanent staff or for the contractual services of temporary staff who assist assessing officials. This appropriation must be approved by the county council.
- making annual adjustments under IC 6-1.1-4-4.5.
- the verification under 50 IAC 27-4-7 of sales disclosure forms forwarded to the county assessor or the township assessors (if any) under IC 6-1.1-5.5-3.

## **Real and Personal Property Guide**

The use of a unit of machinery, equipment, or structure determines its classification as real or personal property. If the unit is directly used for manufacturing, or a process of manufacturing, it is considered personal property. If the unit is a land or building improvement, it is considered real property. On-site utility piping, such as sanitary and storm sewers, potable water and fire prevention lines, and gas lines are considered on-site development costs and are included in the base rate when calculating the value of land. Real property land improvements are those improvements extraneous to site development, which are placed on the land to improve the parcel. They are normally considered yard items when calculating the replacement cost of the item. Real property land improvements include, but are not limited to, the following:

- retaining walls
- private roads
- paved roads
- bridges
- fencing
- reservoirs
- dams
- fixed river, lake, or tidewater wharves and docks
- permanent standard gauge railroad trackage, bridges, and trestles
- walls forming storage yards and fire prevention dikes.

Structural components and other improvements to buildings are considered real property. These include, but are not limited to, the following:

- foundations
- walls
- floors
- roof
- insulation
- stairways
- partitions
- loading and unloading platforms
- canopies
- areaways
- heating systems
- air conditioning
- ventilation systems
- sanitation
- fixed fire protection
- lighting
- plumbing and drinking water
- elevators and escalators.

To be considered real property, a mobile/manufactured home, must be attached to a permanent foundation or is a mobile/manufactured home where the owner has surrendered the certificate of title under IC 9-17-6-15.1.

A mobile home that does not meet the above criteria and is not assessed as inventory are to be assessed annually under 50 IAC 3.3.

*Table 1-1* identifies property as either real property or personal property.

**Table 1-1. Real and Personal Property** 

|   | 1        |
|---|----------|
| Property  | Туре     |
| Agricultural irrigation system, including the distribution system above or below ground | Personal |
| Air conditioning  |          |
| Building air conditioning for comfort of occupants                                      | Real     |
| Package units, through the wall commercial type   | Real     |
| Special process equipment to maintain controlled temperature and humidity               | Personal |
| Window units, through the wall or inserted in window                                    | Personal |
| Air lines for machinery and equipment   | Personal |
| Alarm systems   |          |
| Fire alarm system   | Personal |
| Security alarm system   | Personal |
| Aluminum pot lines  | Personal |
