To: Department of Local Government Finance

You will find in this workbook the sales ratio and equalization study for Montgomery County. We have included in this workbook the abstract tab which compares the certified values to the workbook values for all parcels. We have also included the certified total values in each tab of the sales ratio study as requested. Please notify the Montgomery County Assessor as soon as possible with any questions or with the certification of acceptance. They are very close to completing the process needed in order to print form 11's, but will not print the form 11's until hearing from the DLGF.

We would like to point out that the industrial land values were trended in accordance with the commercial land values. The neighborhoods are tied together and therefore receive the same trending factors. There was only one vacant industrial sale and it included forty acres of land that is used for farm ground which therefore makes the sale higher than what can be assessed. We had no industrial improved sales for 2006 and 2007. Upon speaking with local appraisers and reviewing trends in similar size counties, we trended the industrial improvements down 2%.

There is a grouped tab in which we have grouped the commercial properties throughout the county. We trended all of the commercial properties the same regardless of township based on the sales available. We have also grouped the unimproved residential properties for all townships except Union. We do know that we are borderline on the PRD for vacant residential sales in Brown Township, but there were only 2 sales and when combined with other townships it is within the IAAO standards.

We look forward to hearing from you.

Thank You,

Peg Hudson
Montgomery County Assessor

jam
