

#### Aborted Pass Maneuver Distance

| 85th Percentile<br>Speed, km/h (mph) | Distance<br>(APM-B) |
|--------------------------------------|---------------------|
| 50 (30)                              | 110 m               |
| 60 (35)                              | 140 m               |
| 60 (40)                              | 150 m               |
| 70 (45)                              | 170 m               |
| 80 (50)                              | 180 m               |
| 90 (55)                              | 200 m               |
| 100 (60)                             | 200 m               |

#### GENERAL NOTES

1. The minimum length of the no passing zone at narrow bridges if marked, shall be the distance APM-B.  
If the 85th percentile speed is not known add 10 km/h (5 mph) to the posted limit and use the appropriate distance APM-B.

├ D-1 or D-3 Delineator  
┤ D-1 Delineator (Bi-directional)

All dimensions are in mm unless otherwise specified.
