Indicator 1: Percent of infants and toddlers with IFSPs who receive the early intervention services on their IFSPs in a timely manner. (20U.S.C. 1416(a)(3)(A) and 1442). Indiana defines timely as within 30 days of the parent signature on the IFSP or change page.

Family reasons for delay of timely services are included in the total number of IFSPs reviewed and does not count against the SPOE. Family late starts are included in the number of services over 30 days if applicable.

*Due to issues during data migration of records from the legacy system to the current system, the address records were incorrectly end-dated which resulted in the address fields not displaying the active address for these children. To make these addresses active, users had to manually review each child's record, however, after 3/1/21 implementation of the new system, a significant issue was encountered with address validation which rendered many of those address records incomplete within the data system as well. The system captured the street address of the child but did not include the county or SPOE as the system was designed to populate this information based on the validated address. Children who entered our program after 3/1/21 implementation of the new system, a significant issue was encountered with address validation which rendered many of those address records incomplete within the data system as well. The system captured the street address of the child but did not include the county or SPOE as the system was designed to populate this information based on the validated address.

Fortunately, all records of service delivered in both the legacy and current systems require the provider to select the location of service (I.e., home, child care, community setting, etc.) which is how the settings information was determined.
