

Indiana State Department of Health

WEEKLY INFLUENZA REPORT

Data as of Wednesday, January 25, 2012

The following report is meant to provide local health departments, hospital administrators, health professionals and residents with a general understanding of the burden of influenza-like illness (ILI). Data from several surveillance programs were utilized to produce this report. For further information about the data presented in this report, please call the ISDH Surveillance and Investigation Division at 317-233-7125.

Key Points:

- The current percentage of ILI reported by the emergency department surveillance (ED) system (1.22%) and the sentinel surveillance system (.87%) is below baseline.
- During week 03, 15% (3/21) 2 positive specimens were positive for Influenza A/H3 seasonal influenza, and 1 was positive for Influenza B.
- During week 03, 0 Indiana schools (K-12) reported that their absenteeism rate was 20% or higher.
- Universities and non-university facilities are experiencing low levels of ILI in their communities.
- The Indiana State Department of Health (ISDH), in collaboration with the National Centers for Disease Control and Prevention (CDC) is requesting certain medical professionals to participate in a special enhanced influenza surveillance program. The enhanced influenza surveillance program involves a limited number of selected sites to submit at least 4 nasopharyngeal specimens for RT PCR testing patients with influenza like illness (ILI) to the ISDH Laboratory every week until further notice. The ISDH will provide the shipping (by using a provided pre-paid air bill) and the testing free of charge. Our enhanced system would like to rely heavily on specimens from children. In order to further identify and follow influenza strains and to track any changes in the virus, we need extra specimens to test. The submitter will receive lab results for all positive specimens, all testing supplies and shipping for the specimens submitted. If you are interested in joining our enhanced influenza surveillance program, please e-mail Shawn Richards at srichard@isdh.in.gov to request an enrollment form or discuss the opportunity further. Unauthorized influenza specimens submitted to the ISDH Laboratory will not be tested.
- The ISDH is collaborating with MESH to conduct influenza surveillance for Super Bowl City at the Super Care Clinic from January 27- February 5, 2012. Developed by MESH and the Indianapolis Super Bowl Host Committee, the Super Care Clinic will be located at 300 S. Meridian Street and will serve as a full service urgent care center. The Super Care Clinic will be operated by physicians and nurses from Community Health Network, Franciscan Alliance, Indiana University Medical Group Primary Care/Wishard Health Services, St. Vincent Medical Group, and Indiana University Health. The ISDH will provide specimen collection materials, laboratory testing, and daily analysis of patient data.

Percent of patients who presented at an emergency department (ED) with a chief complaint relating to influenza-like illness – Indiana, 20011/12 & 2010/2009, 2009/10, 2008/9 seasons, 2006/7 & 2007/8 seasonal averages.*† (EDs currently reporting = 113)

*Data obtained from the ISDH Public Health Emergency Surveillance System (PHESS). The 2008/9 season had a “Week 53” which the 2006/7 and 2007/8 seasons did not have, explaining the break in the seasonal average line.

† PHESS data is very timely, so the data reported is for the most current week.

Key Findings

- The current percentage of ILI reported by the emergency department surveillance (ED) system (1.22)

Sentinel reported influenza-like illness by sentinel type and reporting week with number of reporting sites Indiana, 2011/12 season.*

Reporting Week	All Reporters %ILI	Universities %ILI	Non-Universities %ILI
Week 03	.87 (33)	1.47 (33)	.77 (26)
Week 02	1.11 (38)	.76 (8)	1.17 (30)
Week 01	.90 (40)	.61 (9)	.91 (31)

*Data obtained from the ISDH Sentinel Influenza Surveillance System. This data is subject to change as sentinel sites can back-date their weekly reports.

Percent of patients who presented at sentinel provider clinics with symptoms relating to influenza-like illness – Indiana, 2011/2012 data vs. 2006/07 -2010/2011 seasonal averages. 2009/2010 season excluded due to the pandemic*† (Number of sentinel provider clinics who reported this week = 33

**Data obtained from the ISDH Sentinel Influenza Surveillance System.*
† Sentinel data has limited timeliness, so the data reported is for the week before the most current week. This data is subject to change as sentinel sites can back-date their weekly reports.

Sentinel reported influenza-like illness (ILI) by age category for the most current week reported – Indiana, 2011-12 season.

Age category (yrs)	Total number with ILI	Percent with ILI
0–4	12	17
5 –24	38	53
25–49	17	24
50–64	2	3
65+	2	3
Total	71	100

**Data obtained from the ISDH Sentinel Influenza Surveillance System.*
**Sentinel data has limited timeliness, so the data reported is for the week before the most current week. This data is subject to change as sentinel sites can back-date their weekly reports.*

Key Findings

- The percent of patients presenting at sentinel providers with ILI is below baseline.
- Universities and non-universities are experiencing similar levels of ILI in their population.

Sentinel and ED influenza-like illness percentages by reporting week Indiana, 2011/12 season.

Reporting Week	ED Surveillance %ILI	Sentinel Surveillance %ILI
Week 03	1.22	.87
Week 02	1.22	1.11
Week 01	1.4	.90

Number of new deaths associated with laboratory confirmed influenza, by age category – Indiana, January 25, 2012

This week's numbers			Numbers since October 2, 2011	
	Age category (yrs)	Total number	Age category (yrs)	Total number (2009 A/H1N1pdm case)
Number of deaths associated with influenza	0-4	0 (0)	0-4	0 (0)
	5-18	0 (0)	5-18	0 (0)
	19-24	0 (0)	19-24	0 (0)
	25-49	0 (0)	25-49	0 (0)
	50-64	0 (0)	50-64	0 (0)
	65+	0 (0)	65+	0 (0)
	Unknown	0 (0)	Unknown	0 (0)
	Total	0 (0)	Total	0 (0)

Number of schools (K-12) reporting a 20% or more absenteeism rate – Indiana, 2011/12 school year*

ISDH Laboratory data regarding circulating influenza viruses – Indiana, 2011/12 influenza season.*

PCR Result	This week's total		2012 total	
	Number	Percent of specimens received	Number	Percent of specimens received
2009 A/H1N1pdm virus	0	0%	1	<1%
Influenza A/H3 seasonal virus	2	9.5%	10	7%
Influenza A/H1 seasonal virus	0	0%	0	0%
Influenza B seasonal virus	1	4.8%	1	<1%
Influenza negative	18	85.7%	127	88.8%
Inconclusive	0	0%	1	<1%
Unsatisfactory specimen†	0	0%	3	2.1%
Total	21	100%	143	100%

*Data obtained from the ISDH Laboratory via specimens submitted from the ISDH Sentinel Influenza Surveillance System and IN Sentinel Laboratories.

†Unsatisfactory specimens include specimens that leaked in transit, were too long in transit, or were inappropriately labeled.

2009 H1N1pdm-positive samples by age group – Indiana, 2011/12 influenza season.*

This week's numbers				2012 totals	
	Age category (yrs)	Total number	Percent by age group	Total number	Percent by age group
2009 H1N1pdm-positive specimens	0-4	0	100%	1	100%
	5-18	0	0%	0	0%
	19-24	0	0%	0	0%
