

WASTEWATER OPERATOR EXAMINATION STUDY KEY

CLASS B

For Class B:

Manuals used for examination questions are prepared by and available through California State University, Sacramento College of Engineering and Computer Science, Office of Water Programs (Referred to hereafter as the Sacramento manuals).

Web site: <http://www.owp.csus.edu/> Email: <mailto:wateroffice@csus.edu/>

Categories of test questions which will be covered by the Sacramento manuals and the percentage of the examination questions comprised from that area are listed below:

<i>Activated Sludge</i>	3-5%
<i>Advanced Treatment</i>	3-5%
<i>Clarifiers</i>	3-5%
<i>Industrial Treatment</i>	30%
<i>Laboratory</i>	10%
<i>Maintenance</i>	5%
<i>Preliminary treatment</i>	5%
<i>Safety</i>	5%
<i>Solids Handling</i>	7-10%

(NOTE: These percentages are approximate)

Study these chapters:

Industrial Waste Treatment – Volume I

<i>Chapter 1</i>	The Industrial Plant Operator
<i>Chapter 3</i>	Regulatory Requirements
<i>Chapter 4</i>	Preventing and Minimizing Wastes at the Source
<i>Chapter 5</i>	Industrial Wastewaters
<i>Chapter 6</i>	Flow Measurement
<i>Chapter 7</i>	Preliminary Treatment
<i>Chapter 8</i>	Physical-Chemical Treatment Processes
<i>Chapter 9</i>	Filtration
<i>Chapter 10</i>	Physical Treatment Processes
<i>Chapter 11</i>	Treatment of Metal Wastestreams

Industrial Waste Treatment – Volume II

<i>Chapter 3</i>	Activated Sludge Process Control
<i>Chapter 4</i>	Sequencing Batch Reactors
<i>Chapter 5</i>	Enhanced Biological Treatment
<i>Chapter 7</i>	Residual Solids Management
<i>Chapter 8</i>	Maintenance

Operation of Wastewater Treatment Plants – Volume II

<i>Chapter 16</i>	Laboratory Procedures and Chemistry
-------------------	-------------------------------------

WASTEWATER OPERATOR EXAMINATION STUDY KEY

CLASS B

Mathematics 10 – 15 %

Web site for the Class B Formula Sheet:

https://www.in.gov/idem/cleanwater/files/wastewater_cert_study_guide_formula_sheet.pdf

Any mathematics problem given on the examination will have the appropriate formula listed on the Formula Sheet furnished with the exam on that day. It is recommended that you look over the formula sheets and work any problems in the Sacramento manuals.

Solving these problems involve plugging the numbers given in the problem into the correct formula and calculating the answer.

There are a few basic rules that apply to solving formulas:

1. Work from left to right
2. Do all of the multiplication and division above the line (in the numerator) and below the line (in the denominator); then do the addition and subtraction above and below the line.
3. Perform the division (divide the numerator by the denominator).
4. Parentheses () are used in formulas to identify separate parts of a problem.

Work the arithmetic within the parentheses before working outside the parentheses. Use the same order stated in rules 1, 2, and 3 above when working inside of parentheses.

Pretreatment 3-5%

Industrial Waste Treatment, Volume I:

Chapter 3 Regulatory Requirements

Rules/Regulations/Completing reports 20%

The remainder of the examination questions will cover Rules and Regulations located in Part II, Section One, of the Wastewater Certification Manual.

There will also be questions related to completion of the Discharge Monitoring Report (DMR) and the Monthly Report of Operation (MRO). A worksheet and necessary additional documents are incorporated into the Certification Manual as Appendices A, B, C, and D.
