

# LOOKING to the future

## Voluntary Environmental Recognition Programs

### About the Indiana Partners for Pollution Prevention

In 1996, the Indiana Department of Environmental Management facilitated the development of the Indiana Partners for Pollution Prevention (Partners). Since then, the membership has grown to approximately 94 organizations. The Indiana Partners for Pollution Prevention is comprised of Indiana industries, businesses, nonprofit organizations and governmental entities that are interested in pollution prevention (P2), as well as the financial and environmental benefits P2 projects can bring. The Partners realize that pollution prevention is the arena where the environment and economics can meet on common ground, and successful practices and approaches can be promoted to achieve measurable reduction of pollution in Indiana. The Partners also provide a forum where Indiana businesses can network, exchange ideas about P2 experiences, and discuss how P2 fits into current and future IDEM programs.

### About the Environmental Stewardship Program

IDEM's Environmental Stewardship Program is a free, voluntary, performance-based leadership program designed to recognize and reward Indiana regulated entities for going above and beyond current environmental regulations. In return for your exemplary environmental performance, your facility could receive program incentives including regulatory flexibility, public recognition, and networking opportunities.

In order to be eligible for ESP you must have a satisfactory environmental compliance history; have or implement an approved environmental management system (EMS); and, commit to at least one environmental improvement initiative per year. Together, the EMS and the steward's commitment to continual environmental improvement will increase their efficiency, decrease environmental impacts, and save the business time, money, and resources.

**In order to live our mission to prevent pollution, we are not printing conference materials. We have boosted the WiFi signal for easier access to your electronic devices.**
