Custom Manufacturing

Available Through Your Local Fastenal Store

Our ISO 9001:2000-compliant manufacturing division can produce or modify virtually anything that needs to be cut, formed, fully machined, hot forged, welded, threaded, bent, turned, milled, or otherwise manipulated – quickly making “unavailable” parts available.

Custom Inventory Management Solutions

Your local Fastenal store can help you plan and implement a customized inventory management solution to streamline your product flow, increase productivity,

and drive down your total cost of inventory ownership.

Here's what your local Fastenal store can do for you:

- Provide **dedicated local inventory**, so you'll always have rapid access to the products you need without having to warehouse them
- Implement a **tailor-made bin/scanning system** to ensure that inventory is easily accessible, continually optimized, and positioned for efficient usage
- Eliminate **stock-outs and overstocks** by continually replenishing your stock areas based on evolving min/max limits that reflect on your actual usage

Industrial Services

- Bandsaw Blade Welding
- Chain & Cable Cutting
- Chain Sling Fabrication & Inspection
- Custom Packaging
- Hose Assemblies
- Laboratory Services
- Metals Services
- Product Sourcing
- Tool & Cutter Grinding
- Tool & Hoist Repair

Quality People

At Fastenal we're committed to hiring great people and helping them reach their full potential in pursuit of our customer service mission. The result is an exceptionally dedicated, motivated and knowledgeable group of people to serve your business.

- **95% of our store managers** are promoted from within based on merit
- Each year **thousands of employees** attend our corporate university to enhance their skills and product knowledge
- Many company managers (including our CEO) have risen through the ranks over the course of **lifetime Fastenal careers**
