

Sensitive Population - FISH CONSUMPTION ADVISORY

| Location | Species | Fish Size | Maximum Amount for Adults to Eat |
|--------------------------------|---------------|-----------------------------------|----------------------------------|
| Anderson River Perry County | Black Buffalo | 25+ | Do not eat |
| | Bluegill | up to 7 | 1 meal / week (8 ounces / week) |
| | Common Carp | up to 22 | 1 meal / week (8 ounces / week) |
| 22+ | | 1 meal / month (8 ounces / month) | |

Sensitive Population

*Sensitive populations include: pregnant or nursing women, women that will become pregnant, and children under 6 years of age. These consumers should use caution when eating some types of sportfish.

**The maximum amount for adults to eat is determined by fishing location, species and fish length. For instance, if you eat the maximum amount of one species during a week, you should not eat any other fish which has a consumption limitation until the following week. Example - if you eat the limit (4 ounces) of a 20 inch long Carp from the Easy Catch River, then you should not eat any other sportfish from the list until the following week.
