# SRCS SHAREit:  Login Basics

## Creating your library-specific URL

Your library-specific URL may be created using the following URL:

http://srcs-agent.auto-graphics.com/mvc/?cid=srcs&lid=**xxxxx**&reset=force

You **must** replace **xxxxx** with your SHAREit library code (example: AKRON-AKR)

## Logging in with a staff username / password

**ILL library staff** may login with:
Username = [SHAREit code]
Password = ill

**ILL library administrative staff** may login with:
Username = [SHAREit code] + admin (i.e., "akron-akradmin")
Password = [same as username; [SHAREit code]admin

## Logging in for patrons – to request and track ILLs
For libraries using NCIP or SIP2, patrons will log into SRCS/SHAREit using their local ILS authentication.

For libraries not using NCIP or SIP2, patrons will log into SRCS/SHAREit using patron accounts inside of SHAREit.  Alternatively, staff may simply initiate ILL requests on the patron's behalf.
