*NOTE: There are less than 10 students enrolled in the class. $\mathbf{N}$ size is too small for them to be eligible.

|  | Eligible Straight 2012 Bonus | Eligible Straight 2013 Bonus |
| :--- | :---: | :---: |
|  |  |  |
| ELA 8-10 | 64 | 73 |
| ELA 10-12 | 305 | 101 |
| Math 8-10 | 31 | 114 |
| Math $\mathbf{1 0 - 1 2}$ | 295 | 122 |

## Bonus Points Breakdown

## Conclusions: High School Only Findings:

## Letter Grade Changes

Math 8-10: 11 high schools were affected 1 letter grade lower using the 2012 target bonus points.
Math 10-12: 30 high schools would have changed 1 letter grade higher using the 2012 target bonus points.

8-10 ELA: 6 high schools would have changed 1 letter grade lower using the 2012 target bonus points
10-12 ELA: 47 high schools would have changed 1 letter grade higher using the 2012 target bonus points

No high school could change more than 1 letter grade using 2013 data vs. 2012 target bonus points.

## Positive Impact:

Overall findings: 52 schools would have changed 1 letter grade higher using the 2012 target bonus points vs. the 2013 target bonus points.

25 schools would have received 2 target bonus points but still would have only increased by 1 letter grade.

## Negative Impact:

There were 17 high schools that would have received 1 letter grade lower if the 2012 target bonus were used with the 2013 data.

Combined there are 69 schools that would receive a different grade either negatively or positively using the 2013 data vs the 2012 target bonus point

## Bonus Points Facts:

Math 8-10: 82 additional schools received the .5 bonus pt using 2013 bonus formula that would not have received it in 2012

Math 10-12: 174 schools will not receive the .5 bonus point using 2013 bonus formula that would have received it in 2012

ELA 8-10: 35 additional schools received the .5 bonus pt using the 2013 formula that would have not received it in 2012

ELA 10-12: 221 high schools will not receive the .5 bonus pt using the 2013 formula that would have received it in 2012
