

Jail Data Summary

On July 21, 2017, the Indiana Sheriffs' Association (ISA) distributed a survey to all Sheriffs statewide asking for a summary of each county's current jail population. Below is a summary of the data received from the 91 jails across the state (Ohio County no longer has their own jail). Although the "snap-shot" date was provided by each county, overall survey results range from July 18, 2017 to September 14, 2017.

- 25 different jail management systems reported
- Annual cost of jail management systems totaling \$1,622,241.08
- Although 44% of jail beds are filled with an F6 inmate, only 10% of all jail beds are filled due to *Sentenced* F6s.
- 44 jails are over capacity. Even if every *Sentenced* F6 were sent to DOC, there would still be 31 jails over capacity. However, if ½ of the pretrial population were released to pretrial supervision, only 13 jails would be over capacity.

Misdemeanor Jail Inmates

Indiana Sheriffs Jail Data Survey – July 2017

Thank you for taking the time to answer these questions and provide some preliminary data regarding the current status of your jail facility.

Today's Date: _____

1. What is the total bed capacity in your jail?ⁱ _____

2. Please provide whole numbers based on today's current jail population in the grid below. Each offender should be counted only once. If an offender falls in to more than one category, please use this hierarchy when deciding which category to place the offender: (1) Federal Hold/Inmate, (2) DOC Inmate, (3) Sentenced to Jail, (4) Pretrial Detainee, (5) Probation Violator, (6) Failure to Appear, (7) Other. Also, please categorize each offender by the highest level of offense (highest charged offense if not yet convicted or highest convicted offense if case is disposed).

	Murder, Felony 1-5	Felony 6	Misdemeanor	Civil
Federal Hold/Inmate				
DOC Inmate				
Sentenced to Jail				
Pretrial Detainee				
Probation Violator				
Failure to Appear				
Other				

3. What Jail Management System do you currently use? _____

4. What is the annual cost of the Jail Management System? _____

ⁱ Bed Capacity is defined as:

General Population Beds – refers to beds in a cell housing area with a common dayroom. Include the number of cells and the number of beds in each cell. Do not include temporary beds (boats, mats or beds that have not been approved by the State Jail Inspector).

Isolation Cells – refers to all segregation cells, medical isolations cells and holding cells that have a secure bed and commode. Padded cells are not included in isolation cells. Do not include detox areas, bullpens or other group holding areas.

Comparison of FD and F6 jail sentences

- In June 2014, the last month before 1006 took effect, 2,726 people were sentenced for Class D Felonies. In June 2017, 3,499 people were sentenced for Level 6 felonies, a 28% increase. This can be attributed in part to the shifting of many offenses from higher to lower levels; in 2014 71% of all felony sentences were for D Felonies, while in 2017 77% of all felony sentences are for Level 6 Felonies.
- In June 2014, 40% of FD Felons that were given an executed sentence served that sentence in the county jail, not DOC. In June 2017, 88% of Level 6 felons that were given an executed sentence served that sentence in the county jail, not DOC. The number of F6 felons sentenced to jail in June 2017 was 177% higher than the number of FD felons sentenced to jail in June 2014.

- The average length of sentences given to F6 felons is 31% shorter than sentences given to FD felons. In June 2014, FD felons were given an average of 113 days executed, while in June 2017 F6 felons were given an average of 77 days executed. There was also a slight reduction in the percentage of felons receiving executed sentences; in June 2014, 65% of FD felons received executed sentences, while in June 2017 63% of F6 felons received executed sentences. (This includes sentences to both county jails and DOC.)
- In June 2014 FD felons were sentenced to a total of 81,683 days in county jails. 48,202 of those days were served in jail before their sentencing hearing, leaving 33,481 days to be executed post-sentence. In June 2017, F6 felons were sentenced to 198,260 days in county jails. However, 103,049 of those days were served pre-trial, leaving 95,211 days left to serve post-sentence. This is a 184% increase over the number of days ordered post-sentence for FD felons in June 2014.

- In June 2014, 1,798 FD felons were sentenced to community supervision, or 66% of those sentenced. In June 2017, 2,328 F6 felons were sentenced to community supervision, or 67% of those sentenced.
- In June 2017, 12 people were sentenced to county jails for dealing drugs as a Level 6 felony for a total of 695 days.

1006 Impact

1. There has been a shift away from DOC sentences in favor of placement in local jails and probation. In March 2014, the most common sentence for a felony was a straight commitment to DOC, meaning the person was sentenced to a DOC commitment without community corrections or probation. These made up 22% of all original abstracts. Now, this type of sentence makes up only 10% of original abstracts, and is the fifth most common type of sentence. The most common type of sentence now is a jail sentence followed by probation. This category represented 15% of original abstracts in March 2014, but rose to 27% of abstracts by December 2016.
2. Not only are F6 offenders being diverted to jails, the amount of time they are spending incarcerated is much lower than for FD offenders. In 2016, the average number of days imposed for a Class D Felony was 141, while the average number of days imposed for a Level 6 Felony was 84.
3. Serious offenders are spending more time incarcerated in prison. The sentences being imposed have not changed significantly; however, the new credit time rules result in longer prison stays for higher level felonies. Overall, after adjusting for credit time, in 2016 the average DOC executed sentence for each felony level was as follows:
 - a. Class A Felonies: 4,178 days
 - b. Level 1 and 2 Felonies combined: 5,420 days

 - c. Class B Felonies: 984 days
 - d. Level 3 and 4 Felonies combined: 1,783 days

 - e. Class C Felonies: 578 days
 - f. Level 5 Felonies: 782 days
4. Sentences to the DOC for Property and Substance crimes have fallen dramatically. In March 2014, when we started tracking this data, offenders were sentenced to a total of 211,380 bed-days for Property crimes. In December 2016, that number was 92,166, a 56% reduction. For Substance crimes over the same time period, the total number of DOC bed-days sentenced dropped from 397,178 to 171,335, a 55% drop.
5. One thing that has not changed significantly is the amount of time felons are spending in pre-trial incarceration. In 2016, felons spent an average of 77 actual days incarcerated pre-trial. This is a slight decrease from 82 actual days of pre-trial incarceration in 2015. Pre-trial incarceration has a huge effect on county budgets, particularly with F6 offenders. F6 offenders spent an average of 45 days incarcerated pre-trial in 2016. As discussed above, the average sentence on an F6 is 84 days, meaning that F6 offenders are spending more than half of their sentences in pre-trial detention. The DOC will only reimburse counties for incarcerating F6 offenders post-sentence; the entire cost of incarcerating F6 offenders pre-trial falls on the counties. In 2016, 41% of F6 offenders who received executed sentences had already served the entire sentence, meaning the county was not eligible to recoup any of the cost of incarceration that offender. In 2016, offenders spent 1,327,870 days in pre-trial incarceration for F6 offenses. If these sentences had been served post-sentence, the counties would have been eligible for \$43,160,075 in reimbursement from the DOC (this is slightly less than \$35 per day because a small percentage of these offenders are eligible to go to DOC).
