I request review of the entire order described	Yes

What is the scope of your request?	
I request a stay of effectiveness	Yes
What is the basis of your challenge?	We were explained that the Deadbolt was was effective so that no one could open door to balcony could not be opened it was inspected by the fire chief Don Heim and the security inspector Seth Eckstein. they explained it was great, When the Sanction was received again, I feel we should not be Sanction for at first we were told that it was great, It was not our fault, I believe Mr. Seth Eckstein should have given us a proper warning saying he was at fault should have checked and we would have fixed it immedately fixed the problem which is now been fixed.
What is your desired outcome?	That we do not have to ojlpay any sanctions for we have complied right away, so if we were not told it was ok with the deadbolt was great. We put that deadbolt it was inspected and approved. We now have A Board covering the door no one can enter or go out.
Additional Information in Support of Request	I am sure that if asked Fire cheif Don Heim and Seth Eckstein would say the same.
