Re: Jorgenson Cabin

Dear Mr. Illingworth:

The Young Men's Christian Association is requesting an administrative review of the order to remove vessel IN# 333656 from service dated May 28, 2015.

The tank in question was installed in the summer of 2014 as part of the domestic water service for the new camp cabin constructed that same summer.

The YMCA maintains that it is not in violation of the Indiana Boiler and Pressure Vessel rules so this order should be null and void. Per the following section of the rule this tank is exempt from inspection programs and operating permit requirements:

"Section 2 680 IAC 2-1-5 Exemptions

Sec. 5. (a) Boilers and pressure vessels are exempt from this article as set forth in section 2 of this rule.

(b) Regulated boilers and pressure vessels are exempt from inspection programs and operating permit requirements as set forth as follows:

(3) Any pressure vessel:

(A) Containing only water under pressure for domestic supply purposes, including one containing air, if the compressed air serves only as a cushion or a part of an airlift pumping system; and (B) located in an owner occupied residence or a residential structure with less than seven (7) apartments."

The Jorgenson cabin is a residential structure with less than seven apartments. The tank in question is part of the domestic water service.

Please let me know if you have any questions.

Sincerely

GRINSFELDER ASSOCIATES ARCHITECTS, INC.

ORDER

An inspection was conducted on May 19, 2015, by an authorized inspector, and reported to this office. That inspection revealed that the above identified object(s) were in unsatisfactory condition. You must comply with the Authorized Inspector's recommendations in order to meet the requirements of Indiana law. The requisite "Certificate of Inspection" will not be issued until such time as the Inspector's recommendation(s) have been complied with. In order to verify compliance a re-inspection must be performed. It is your responsibility:

1. To comply with the inspector's recommendation.
2. To arrange for re-inspection to be made by the inspector to verify compliance.
3. To contact the Indiana Boiler and Pressure Vessel Safety Division to apprise the status of the recommendation, prior to the date of compliance.

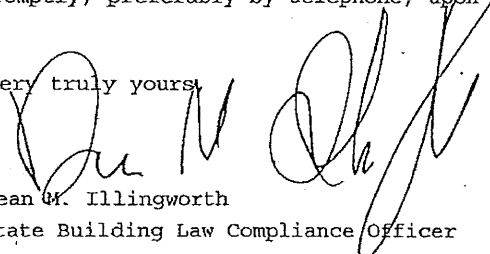

In any case, no violation may be cleared until such time as the Indiana Boiler and Pressure Vessel Safety Division receives verification that compliance with the requirements of the inspector has been achieved.

This verification shall be in the form of a new "Report of Inspection", completed by the originating inspector, or one designated to do so by the Chief Inspector of the state of Indiana. The inspector's report verifying compliance must be received by the Indiana Boiler and Pressure Vessel Safety Division no later than July 31, 2015.

Please be advised that if you desire administrative review of this action, you must file a written petition for review at the above address with the Fire Prevention and Building Safety Commission identifying the matter for which you seek review no later than eighteen days from the date of this letter, unless such date is a Saturday, Sunday, legal holiday under State statute, or a day that this office is closed during regular business hours. If you do so, your petition for review will be granted and an administrative law judge of the Fire Prevention and Building Safety Commission will conduct an administrative proceeding. If you do not file a petition for review, this action will be final.

Be further advised that you may request an opportunity to informally discuss this matter prior to filing a petition for review. Such an informal discussion, or a request therefore, does not extend the deadline for filing a petition for review; and therefore, any request should be made promptly, preferably by telephone, upon receipt of this notice.

Very truly yours,

Dean W. Illingworth
State Building Law Compliance Officer
