Addendum No. 2

Issue Date: Tuesday, October 15th, 2024 Quote Date: **October 24th, 2024**

The purpose of this Addendum is to make changes, additions, deletions, revisions and clarifications to the quote documents for the solicitation referenced above. Bidders shall review the Addendum requirements in detail and incorporate any effects the Addendum may have in their quote price.

In response to bidder inquiries, please note the following confirmations and clarifications:

Clarification: An alternate product for the invert repair has been submit, reviewed and approved as an equal. Vortex submit the GeoKrete as well as the QM-1s Restore. Both are an acceptable alternative for the invert repair of the principal spillway conduit.

Clarification: In addition to the estimated 165-lft of invert repair for the horizontal invert of the principal spillway, there is a sloped area at the very start of the spillway conduit that also has exposed rebar. This will need to be included in the invert repair section. Please see attached exhibit for a visual.

Reminder: Bids are due October 24th, 2024 at 2:31PM EST. Bids will be publicly opened and read online in a Microsoft Teams Live Event – 3:00PM.

This Addendum consists of 3 pages including attachments.

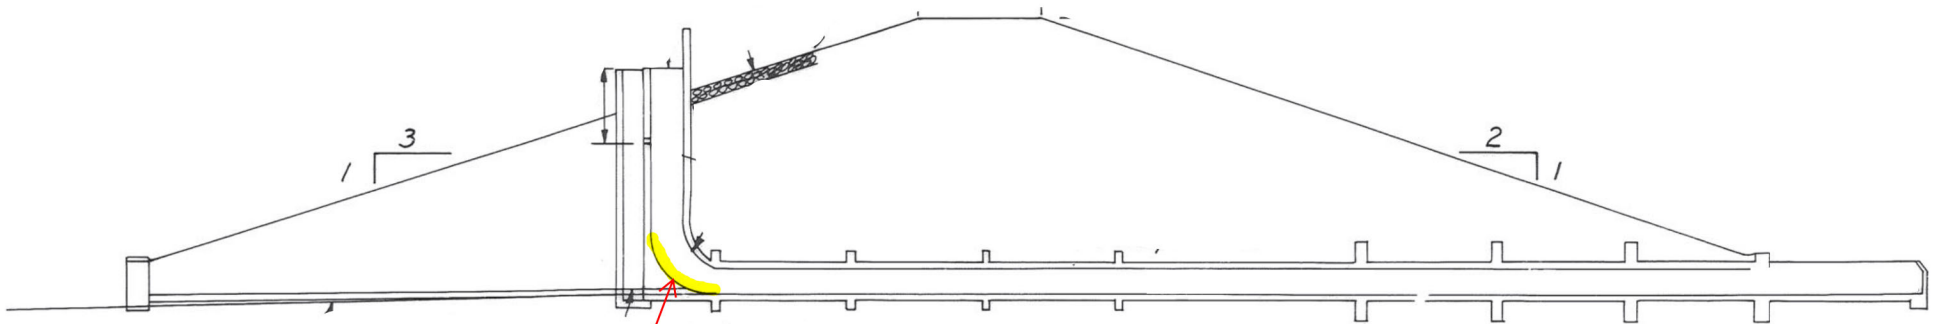

Attachments:

1. Exposed Rebar_Invert Repair Exh – 2 pages

Certified By:

Joseph Miller, P.E.

Area of conduit with exposed rebar that also needs invert repair.

SKEWED SECTION ϕ OF PRINCIPAL SPILLWAY
