

**I-65/I-70 North Split Project
Proposers Questions to RFQ
Question & Answer Matrix #1
Issued on April 22, 2019**

INDOT No.	Doc/Sec/Page	Question	INDOT Response
1.	RFQ Part A, Section 2.1.3(b)	The current requirements for the SOQ states in section 2.1.3(b) that the proposer must be prequalified in either category A(a) or D(b). Can prequalification category B(a) be added? This project is being bid as a Design Build Best Value, the assumption is that pavement type and design wouldn't be finalized until the RFP stage.	Prequalification category B(a) is "Asphalt Pavement – with Certified Hot Mix Asphalt (HMA) Plant". The proposed pavement for the RFP will be prescribed as concrete pavement, therefore B(a) category is not applicable.
2.		Will there be, or has there been, a meeting to present and discuss the North Split Design Build to the Contracting, Design & Finance Community?	There will not be a project specific meeting for the North Split project. However, INDOT will be holding an Industry Day for several major projects in and around Indianapolis on May 9, 2019, including the North Split project.
