01-10**

TO: District Directors
District Construction Engineers
Toll Road Operations Engineer
District Material & Tests Engineers
District Area Engineers
Project Engineers/Supervisors

FROM: Timothy D. Bertram, Chief
Contracts and Construction Division

RE: Curing-Sealing Materials

Section 702.22(C) of the Standard Specifications outlines the use of curing-sealing materials. These materials may be used in lieu of protective covering curing methods when surface seal is required. It further explains that these materials shall not be used on concrete surfaces that are subjected to vehicular traffic or that have not been formed using the slip form method. This prohibits the use of these materials on bridge decks and any concrete surface that has been formed with conventional forms. Please see that this specification is adhered to.
