General Tips for Picking Up Your Prescription

- Call the pharmacy to make sure your prescription is ready
- Ask if they have a drive-thru window or curbside pick-up option
 - If not, you can ask to transfer your prescription to a location with a drive-thru or curbside pick-up option
- Know what medications you need to pick up
- If you are high-risk (over age 65, immunocompromised, asthma, chronic lung disease, uncontrolled diabetes or hypertension, or serious heart conditions), if possible, send a lower-risk family member to pick up your medication from a drive-thru pharmacy
- Make sure to have proper identification, if required, for your prescription
