

All changes effective Jan. 1, 2025

Summary of Changes to the Indiana Reportable Disease List for Healthcare Providers and Hospitals

- Diseases that are newly reportable
 - Oropouche virus
 - Grouped under “Arboviral disease or infection, imported”
- Diseases removed
 - Granuloma inguinale
 - Lymphocytic choriomeningitis virus
- Diseases with format/wording changes only
 - Arboviral disease or infection, domestic: California serogroup viruses, Jamestown Canyon virus, La Crosse virus, Powassan virus, St. Louis encephalitis virus, West Nile virus, Western equine encephalitis virus.
 - Previously listed as Arboviral disease or infection, domestic: West Nile virus (WNV), St. Louis encephalitis virus (SLEV), Western equine encephalitis virus (WEEV), California serogroup viruses, La Crosse virus (LACV), Jamestown Canyon virus (JCV), Powassan virus (POWV)
 - Arboviral disease or infection, imported: Chikungunya virus, Dengue virus, Japanese encephalitis, Oropouche virus, Yellow fever, Zika virus
 - Previously listed as Arboviral disease or infection, imported: Chikungunya virus (CHIKV), Dengue virus (DENV), Japanese encephalitis, Yellow fever, Zika virus (ZIKV)
 - *Candida auris*
 - Previously listed *Candida auris* and unusual *Candida* spp. (Species other than *C. albicans*, *C. parapsilosis*, *C. dubliniensis*, *C. lusitaniae*, *C. tropicalis*, or *C. krusei*)
 - Middle East respiratory syndrome coronavirus (MERS-CoV)
 - Previously Middle East Respiratory Syndrome (MERS)
 - Pertussis (whooping cough)
 - Previously pertussis
 - SARS-associated coronavirus (SARS-CoV)
 - Previously Severe Acute Respiratory Syndrome Coronavirus (SARS-CoV)

Summary of Changes to the Indiana Reportable Result/Pathogen List for Laboratories

- Results that are newly reportable
 - Oropouche virus
- Results removed
 - Lymphocytic choriomeningitis virus
- Results previously reportable that have been modified in scope
 - Footnote added to Syphilis (*Treponema pallidum*); a section on page 2 was added to expand on reporting requirements specifications.
 - Previously Listed: *Candida auris* and unusual *Candida* spp. (species other than *C. albicans*, *C. parapsilosis*, *C. dubliniensis*, *C. lusitaniae*, *C. tropicalis*, or *C. krusei*)
 - Updated: *Candida auris*
- Updated and reformatted list of isolates that must be submitted to the IDOH Laboratory within three business days.
 - Added Carbapenem-resistant Enterobacterales isolates that have not undergone carbapenamase testing
 - Added Carbapenem-resistant Enterobacterales (CRE) that tests pan-non-susceptible on antimicrobial susceptibility testing (AST)
 - Added All carbapenem-resistant *Acinetobacter baumannii* isolates
 - Added Carbapenem-resistant *Pseudomonas aeruginosa* isolates that are also resistant to cefepime and ceftazidime
 - Added *M. caprae* and *M. pinnipedii* to the *Mycobacterium tuberculosis* complex members included in parentheses
 - Removed unusual *Candida* spp. and listed species in parenthesis
 - Removed Vancomycin Intermediate *Staphylococcus aureus* (VISA). *Staphylococcus aureus* isolated from any body site that are vancomycin intermediate level MIC = 4-8 µg/mL
- Results with format/wording changes only
 - *Anaplasma phagocytophilum*
 - Previously listed as *Anaplasma* spp.
 - Influenza viruses
 - Previously listed as Influenza
 - La Crosse virus; California serogroup viruses
 - Split into two separate results, both under "Arboviruses including, but not limited to."
 - Previously listed as La Crosse (California serogroup) viruses.
 - Middle East respiratory syndrome coronavirus (MERS-CoV)
 - Previously listed as Middle East Respiratory Syndrome Coronavirus (MERS-CoV)
 - SARS-associated coronavirus (SARS-CoV)
 - Previously listed as Severe Acute Respiratory Syndrome Coronavirus (SARS-CoV)
