

Laboratory List for PFAS Initial Monitoring for Water Systems in Indiana January 2025

This list was compiled from laboratories certified by U.S. EPA for UCMR 5 sampling and from laboratories certified by Michigan EGLE for PFAS Analysis. There are other laboratories on both lists, but this list includes laboratories within U.S. EPA, Region 5 and laboratories that are certified for other contaminants by the Indiana Department of Health.

If your existing laboratory is subcontracting PFAS sampling to one of these laboratories, you may use them, however the results will need to be entered as coming from the lab that performed the analyses.

Indiana Department of Health is not performing these tests for public water systems at this time. They should be able to perform these tests for public water systems later this year.

All samples must be analyzed using U.S. EPA Method 533 or 537.1 and must include a Field Blank that will only be analyzed if there is a detection in the original sample.

PFAS Labs certified by U.S. EPA for UCMR 5 sampling

Alliance Technical Group, LLC-Akron (Formerly Summit Environmental Technologies)

3310 Win Street
Cuyahoga Falls, OH 44223
(330)253-8211
