Lake	City of East Chicago Only	( <u>56 FR 56694</u> )	1/0/1992	Not Classified	170/1993	1/0/1997	3/20/2000	3/20/2000	maintenance plan was approved by U.S. EPA on 9/29/2009.
Marion	Part of the City of Indianapolis	11/6/1991 ( <u>56 FR 56694</u> )	1/6/1992	Not Classified	1/6/1995	1/6/1997	3/20/2000	3/20/2008	Updated maintenance plan was approved by U.S. EPA on 9/29/2009.

On April 28, 1971, United States Environmental Protection Agency (U.S. EPA) established primary and secondary 8-hour carbon monoxide (CO) standards at a level of 9 parts per million (ppm) (36 FR 8186). All other areas of Indiana not listed above were designated "unclassifiable/attainment" under the 8-hour CO standard.

On September 13, 1985, due to a lack of evidence of adverse effects on public welfare, U.S. EPA revoked the secondary 8-hour CO standard (<u>50 FR 37484</u>). On August 1, 1994 (<u>59 FR 38906</u>), and again on August 31, 2011 (<u>76 FR 54294</u>), after reviewing available health science, U.S. EPA concluded that the existing primary 8-hour CO standard provided the requisite level of public health protection and retained the existing standard.

Attainment of the 8-hour CO standard is determined by evaluating the 2<sup>nd</sup> highest 8-hour concentration at each monitor within a nonattainment area over each year, which must not exceed 9 ppm.
