Please confirm that the additional specifications found in Seciton 1.4 of RFP have been read and meet.	yes	yes.

Cost Proposal [INSERT VEHICLE TYPE]

Instructions:

Based on the models proposed in "Tab A. Vehicle Minimum Specifications," the Respondent shall provide pricing for the purchase of vehicles listed.

- 1). Provide answers to all cells shaded in yellow for each vehicle type that you responded to in "Tab A. Vehicle Minimum Specifications." The incentives amount agreed to will be the minimum incentive amount guaranteed to the State for a particular vehicle category. The State shall receive any other incentives offered at the time of sale of each vehicle in addition to the guaranteed incentives
- 2). Use the Cost Component Definitions tab to aid in your understanding of the terms you are required to fill out.
- 3). Do not change the formatting of any cell; the cells have been pre-formatted for the proper evaluation of the Respondents' cost proposals. For cells formatted with dollars, enter only amounts up to the cent value (e.g. \$.01). For cells formatted with percentages, enter only amounts up to the hundredth decimal place (e.g. 0.01%)
- 4). Enter "0" if there is no charge for an item. Mark cells with "Not Available," if an option or accessory is not available for a specific vehicle, even as an aftermarket add-on. Mark cells with "Not Applicable," if something is not applicable to the proposal. Do not leave any cells blank in any vehicle that you are intending to respond to. Doing so could result in an incorrect analysis of the proposal and disqualification of the Respondent.

	Type-6 Fire Truck
Manufacturer	Dodge / Ram
Model	5300
