Prediabetes is when a person’s blood sugars are higher than normal, but not high enough for that person to be diagnosed with diabetes.

Diabetes is a disease where the body does not make or use insulin properly.

86 million People in the U.S. have prediabetes.

1 in 3 One in three adults in Indiana has prediabetes.

Prediabetes
- 9 out of 10 people don’t know they have prediabetes.
- Prediabetes can increase your risk of getting type 2 diabetes, heart disease or stroke.
- 15 to 30% of people with prediabetes will get type 2 diabetes within five (5) years.
- You can prevent or delay the disease through the Diabetes Prevention Program (DPP).
- Prediabetes is also known as: impaired fasting glucose, insulin resistance, impaired glucose tolerance, a little touch of sugar or borderline sugar.

Steps to reduce your chance of getting diabetes:
- Exercise for at least 150 minutes every week.
- Eat more fruits and vegetables.
- Try to lose weight.
- Join a Diabetes Prevention Program.
Risk factors for prediabetes

- Your chance of getting prediabetes increases after the age of 45.
- Men are more likely to get prediabetes than women.
- You are a woman who has had gestational diabetes or had a baby that weighed nine (9) pounds or more.
- You have a brother, sister, mother or father with diabetes.
- You have high blood pressure.
- You don’t get enough exercise.
- You are overweight or obese.
- People who are Latino, African American, Asian, American Indian or Pacific Islander may have a higher risk of getting prediabetes.

Take action

- See your doctor once a year for check-ups—more often if you have a chronic disease like hypertension.
- Maintain a healthy blood pressure and cholesterol level. If you have been told that you have high blood pressure or cholesterol, ask your doctor about the DASH diet.
- At mealtime, make half your plate fruits and veggies.
- Take a walk after lunch and dinner. Just 15 minutes can make a difference.
- Don’t smoke or chew tobacco. If you do, talk to your doctor about the benefits of quitting.
- Get at least eight (8) hours of sleep a night.
- If your health changes, or you aren’t feeling well, talk to your doctor.
- Talk to your doctor or a dietitian about lifestyle changes that could help improve your health.
- Go to www.choosemyplate.gov to find recipe ideas, online tools, and resources to help you eat healthier and move more.
