Ten Essential Services

The Clinton County Health Department strives to protect and promote the health of all residents and visitors of Clinton County.

Indiana Code ([IC 16-20](#)) outlines powers and duties of Indiana Local Health Departments <http://www.in.gov/isdh/24832.htm>.

Our Health Department follows the framework for the responsibilities of local public health systems set forth by the National Public Health Performance Standard Program using the 10 essential services:

- Monitor health status to identify community health problems;
- Diagnose and investigate health problems and health hazards in the community;
- Inform, educate, and empower people about health issues;
- Mobilize community partnerships to identify and solve health problems;
- Develop policies and plans that support individual and community health efforts;
- Enforce laws and regulations that protect health and ensure safety;
- Link people to needed personal health services and assure the provision of health care when otherwise unavailable;
- Assure a competent public health and personal health-care workforce;
- Evaluate effectiveness, accessibility, and quality of personal and population-based health services; and
- Research for new insights and innovative solutions to health problems.
