<b>135°F</b>	Potentially hazardous food cooked for hot-holding: fruits, vegetables, and potentially hazardous foods not otherwise listed that will be hot-held.															

# COOLING

**Cooked potentially hazardous foods shall be cooled:**

- (1) within two hours, from 135°F to 70°F; and
- (2) within four hours, from 70°F to 41°F or less\*
- (3) The entire cooling process must be completed within six (6) continuous hours.

**Food prepared from ingredients at ambient temperature (such as reconstituted foods and canned tuna) shall be cooled:**

Within 4 hours to 41°F or less\*

\* (or 45°F as specified in the Indiana Food Code)

**SUGGESTED COOLING METHODS**

- Place food in shallow pans
- Separate foods into smaller portions
- Use rapid cooling equipment
- Stir food in a container placed in an ice water bath
- Use containers that facilitate heat transfer
- Add ice as an ingredient

# REHEATING

Potentially hazardous food that is cooked, cooled, and reheated for hot-holding shall be reheated so that all parts of the food reach a temperature of at least 165°F for 15 seconds. (If food is reheated in a microwave, all parts of the food must reach a temperature of at least 165°F and be allowed to stand covered for two minutes after reheating.)
