

# Porter County Aging & Community Services

Recognizing the critical role transportation plays in accessing healthcare, our recent Public Health Needs Assessment revealed a significant barrier: lack of transportation. In response, the Porter County Health Department has forged a strategic partnership with PCACS, paving the way for community members to reach essential services.

For more than 60 years, Porter County Aging & Community Services has been dedicated to providing transportation services to seniors, veterans, individuals with disabilities and low-income residents in our community.

The Porter County Health Department partnership with PCACS will allow for more transportation drivers to be hired in an effort to provide rides for over 100 additional individuals who require transportation assistance each week.

In addition, this partnership will allow for the transportation of veterans to essential healthcare facilities outside of Porter County, such as the VA in Lake County.
